PROFESSIONAL SUMMARY

M.S. Data Science student with a B.S. in Computer Science and hands-on experience in data analysis, backend development, and PostgreSQL.

SKILLS

Programming: Python, R, SQL, JavaScript

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Tableau, Excel, ggplot2, Tidyverse

Databases: PostgreSQL, MySQL

Frameworks & Tools: Flask, Node.js, REST APIs, Git

Machine Learning & Statistics: Linear Regression, Logistic Regression, Exploratory Data Analysis, Statistical Modeling

EXPERIENCE

Norfolk Public Schools

Teacher

Norfolk, VA

2022 – Present

- Leveraged performance data and trend analysis to optimize individualized intervention strategies, tripling IEP goal attainment rates across multiple student cohorts.
- Performed exploratory and comparative analysis on student assessment data to identify performance drivers, improving measurable outcomes from 20% to 80% over multiple months.
- Utilized Rethinked to surface performance variance patterns invisible to standard progress reports, presenting visualized findings to administrators and driving IEP goal restructuring toward executive functioning interventions.

PROJECTS

Genre Insights | Python, Flask, Matplotlib, JavaScript, PostgreSQL, REST API (Steam/Valve)

- Ingested and normalized Steam library data via REST API, persisting results in PostgreSQL to support repeatable analysis at scale.
- Applied Simpson's Diversity Index for genre scoring and built a rule-based recommendation engine to surface personalized spending and engagement insights via visual analytics.

DTSC-600 Final | Tableau, Excel

- Designed and delivered a multi-table Tableau sales analytics project joining 4 relational tables across a 7,984-row transactional dataset, building 15+ worksheets spanning standard, statistical, and geospatial chart types.
- Engineered calculated fields, LOD expressions, table calculations, and 3 dynamic parameters to enable scenario-driven analysis of regional profit performance and channel mix.
- Constructed an 11-slide Tableau Story narrating a Wyoming go-to-market recommendation, identifying Tech Accessories as the optimal expansion category through profit-per-capita analysis, trend decomposition, and competitor benchmarking.
- Built an interactive dashboard consolidating KPIs, filters, and parameter-driven views for executive stakeholders.

EDUCATION

EASTERN UNIVERSITY, ST. DAVIDS, PA

Master of Science in Data Science

2026-present

University of the People, Pasadena, CA

Bachelor of Computer Science

2023-2025
